Hello Inland Empire Gymnastics Academy Families!

As the State of California continues down the reopening path and many of the past year's COVID-19 restrictions are being lifted on June 15, for those who have been fully vaccinated, we want to continue to keep you updated on how IEGA will operate through summer and, likely, through the remainder of the year.

First, please know that we are very excited that COVID-19 vaccinations are now available for everyone 12 and older, and hope that many, if not most, of those eligible will take advantage of this important opportunity, which will bring us closer to herd immunity. However, here at IEGA, only 11% of our student population meets this age criteria, which means that the majority of our students are still not able to be vaccinated and are therefore potentially still at risk for contracting COVID-19 or, unknowingly, being a carrier.

Therefore, in order to continue keeping all our students safe, IEGA will be maintaining all of our current health and safety practices, which are posted on the website. Facemasks will continue to be mandatory for all staff, students and parents and inside viewing will remain limited to one adult only for children enrolled in our preschool/kinder classes.

Thank you for your continued support and for being at part of the IEGA family!

Gymnastically Yours,

*Katie Willis*, Owner
